RELEVANT EXPERIENCE

Software Engineer @ EPAM
September 2021 – 2024
Vilnius, Lithuania

- Collaborated with a team of frontend and backend developers to build and maintain an ERP connection for a popular European e-commerce platform.
- Overhauled the administration panel managing the web application's connection with multiple ERP systems.
- Optimized React components and API request handlers, reducing load times by up to 5 times.
- Ensured extensive test coverage through integration, visual regression, and BDD testing to meet comprehensive acceptance criteria.
- Regularly communicated with the product owner and designer to review features and ensure quality assurance.
- Conducted interviews, onboarding sessions, and presentations for new candidates.

Software Engineer
April 2018 – September 2021
Moscow, Russia

- Developed modern and robust code to create advanced systems and software solutions based on customer goals, demands, and business environment.
- Utilized various programming languages, frameworks, and content management systems: JavaScript, TypeScript, React, Express, Node, Strapi, etc.
- Engaged in analysis, design, and implementation in business-critical settings, including UI and server service development and database implementations.

Automation Integration Engineer
June 2018 – August 2019
Bukhara, Uzbekistan

- Designed and implemented automation and centralized control systems.
- Deployed physical and virtual networks for remote systems management and communications.
- Programmed Siemens Simatic PLC and HMI interface on TIA Portal, coded Arduino and compatible microcontrollers in conjunction with OpenHAB as an HMI.
- Achieved telephony and central control network integration with FreePBX (Asterisk) and PHP scripts, connecting to external services such as databases, Google text-to-speech/speech-to-text, Yandex SpeechKit, and Dialogflow.
